

Effective enquiry – led learning

Success criteria refined and modelled for final product

Testing and reforming hypothesis

evaluating genuine and often conflicting evidence

devising questions and hypothesising

reaching firmer conclusions based on evidence

Ideas are shared. Interpretations evaluated

problem-solving, researching independently and in teams

- Make sure you:**
1. spend time getting the key question right
 2. are clear about the end goal
 3. are clear about the key concept/process being addressed
 4. aim for a range of activities that build towards answering the question.
